

## **Position Scientific Advisor**

### **Who we are**

The MútuaTerrassa Research and Innovation Foundation (FDiRMT) is a growing institution that supports one of Catalonia's primary providers of public healthcare services, serving approximately 300,000 individuals in the Western Vallès region, situated approximately 20 kilometers north of Barcelona. The institution includes a University Hospital, operated in consortium with the University of Barcelona, along with eleven Primary Care centers, Socio-healthcare facilities, and an extensive mental healthcare infrastructure.

### **Tasks:**

The mission of the selected person will be to provide technical, statistical, and methodological support for biomedical research projects of MT researchers, especially in cross-sectional projects initiated by FDiR and the Chair of Health and Climate Change University of Barcelona (UB) / MutuaTerrassa, related to the impact of climate change on chronic diseases.

### **What we offer**

- Permanent contract
- Full-time schedule
- Immediate incorporation
- Workplace: Terrassa (Barcelona)

### **Experience, Knowledge, Skills & Selection Criteria**

- Degree in Statistics or Biomedical Sciences/Biomedicine
- Experience in healthcare research

### **Preferred qualifications:**

- Master's or postgraduate degree in health sciences
